Projects

Global Supermarket Analysis | Power BI Desktop, Tableau Desktop, Data Cleaning, Modeling, MySQL

- Performed ETL and processing on **150K+ transactional records** into executive insights dashboard with dynamic filtering and cross-chart actions
- Built a Power BI sales analytics dashboard analyzing and visualizing **\$12.64M global revenue** and **178K units** that accelerated executive **decision-making by 60%**

Weather Analysis | Python, API Integration, Power BI Desktop

- Built a real-time weather analytics dashboard using WeatherAPI to fetch weather data with regular updates every **24 hours** across **75+ global cities** and providing visualizations for temperature and weather forecasting.

Traffic Forecasting using GCN-LSTM Model | Python, Pandas, Numpy, Matplotlib, TensorFlow

- Developed a GCN-LSTM-based ML model to predict real-time traffic conditions and optimize vehicle flow, leveraging graph-based spatial relationships and sequential learning techniques.
- Demonstrated a potential **20-30% reduction** in peak-hour traffic delays in cities where the dataset was collected

E-Voting Application Using Blockchain | HTML, CSS, JavaScript, MongoDB, Python, Solidity, Node.js

- Engineered a decentralized voting system using Ethereum blockchain and smart contracts to ensure secure, transparent, and tamper-proof elections, delivering results **up to 95% faster**.
- Executed MFA, facial recognition and fingerprint scanning, to strengthen voter verification and prevent unauthorized access with **99.99% up time**.

Experience

Sales and Marketing Intern, Semantics Cybernetics LLP

May – June 2023

- Developed **40+ sales leads** from advertiser-based referral streams in support of business efforts.
- Collaborated on sales reports and performed regular data upgradation, data cleaning tasks and low level analysis on the **dataset of over 500 rows**.
