Projects

Financial Fraud Detection | *Power BI, Python*

- Developed a **predictive modeling** project using the PaySim financial transactions dataset to identify potential fraudulent activities
- Built and trained a Random Forest classifier for fraud detection, achieving **94% accuracy** and **92% recall**.
- Designed interactive Power BI dashboards to visualize fraud probability trends, transaction risk categories, and key influencing factors, enhancing interpretability and decision-making.

Global Supermarket Analysis | *Power BI Desktop, Tableau Desktop, Data Cleaning, Modeling, MySQL*

- Cleaned and standardized **150K+** transaction records to ensure **100% data accuracy** for analytics and business reports.
- Designed dashboards tracking **\$12.64M** revenue and **178K units** sold, enabling data-driven decision-making with **60% faster** insights.

Weather Analysis | *Python, API Integration, Power BI Desktop*

- Built a **real-time** reporting system that fetched and refreshed data every 24 hours across **75+ cities**.
- Presented analytical insights and status reports in user-friendly dashboards for quick understanding.

Traffic Forecasting using GCN-LSTM Model | *Python- Pandas, Numpy, Matplotlib, TensorFlow*

- Developed a GCN-LSTM model to predict real-time traffic conditions and optimize vehicle flow, leveraging graph-based spatial relationships and sequential learning techniques.
- Demonstrated a potential **20-30% reduction** in peak-hour traffic delays in cities where the dataset was collected

Experience

Sales and Marketing Intern, Semantics Cybernetics LLP **May – June 2023**

- Developed **40+ sales leads** from advertiser-based referral streams in support of business efforts.
